

Hello,

The moment one of the constituents has a serious accident because they were unable to hear the weather broadcast on their satellite radio or warn a loved one who does listen to any outside media in their home. How will you have best served the people. Many of us have Senior relatives in small area or large towns who are frightened by the media so they just do not participate. My ability to hear a weather broadcast and call them on the phone to warn them is worth their life. Leave this alone please! (Sorry for poor spelling)
